your safe future

Electrical Installations from A to Z (Provisional)

Price List w.e.f. 1st July, 2017

Experience active communication

Our Switchgear can now speak and obey your commands

Face the reality of remote monitoring and controlling of our DI products. Yes, our MCBs and RCDs can now speak and obey your commands!

The Siemens solution for remote communication capability facilitates the following applications, which are inevitable in today's smart infrastructures like Data centers, Commercial Buildings, Energy Management Systems etc.

The solution covers:

- Remote Controlling (ON/OFF) of Final Distribution components (like MCBs/RCDs)
- ON/OFF Status monitoring of all modules for Final distribution products
- Fault Trip Status of components at Final Distribution level

Betagard 5SL MCBs – Inspiring Safety

Siemens has always endeavoured to introduce innovative products worldwide.

Betagard 5SL MCBs offer numerous features -

- MCB with patented unique SLR feature
- ISI and CE marking
- Unique square terminal design
- Terminal covers for extra protection
- RoHS compliant
- Accessories for special applications
- Very low watt loss
- 20,000 operations on rated load

MCB with patented unique **SLR** (Slide Latch-Release) feature for tool free removal from DIN rail. It also allows individual MCB to be removed from bus bar mounted assembly without disturbing other devices

BIS approval for ISI marking as per latest IS/IEC 60898-1:2002 for assured quality and protection

Unique design of square terminals of 35 Sq. mm

Highly effective terminal covers for protection against accidental electrical contact

Unique termination mechanism enables firm mounting of Bus bar together with wire; and provides front access to wires for safe installation

Side mounting accessories like auxiliary switches, fault signaling contacts and lever locking device available for special applications

Betagard 5SL Miniature Circuit Breakers C Characteristics

IS/IEC 60898 - 1

CM/L No. 2255548

- Standards: IS/IEC 60898-1:2002
- Voltage: Un 240/415V, 50...60Hz can be used in systems upto 60V DC for 1P and 110V DC for 2P - suitable for Telecom applications
- With ISI marking: CM/L No. 2255548

SIEMENS

Ingenuity for life

When its about life - There is no compromise

Betagard range of RCCBs and RCBOs
With added intelligence for accurate protection

- Instant protection against electrical shocks and fires.
- Siemens RCDs trips nearly ten times faster than IEC requirement.
- Highly reliable due to current operated mechanism
- ISI mark for assured quality and protection
- Tested for more than 10000 electrical and mechanical operations
- Snap on fit to 35mm DIN rails and can sustain high vibrations
- Rugged design to sustain 10kA fault current

Betagard 5SV Residual Current Circuit Breaker

Enhanced technology for unconditional protection

www.siemens.co.in

Safe protection against residual currents

Residual current protective devices are used for personnel, material and fire protection. This protects human lives and prevents electrical fires.

The new model for more convenience

The optimized design of the residual current protective devices with a separate switch position indicating handle provides greater safety and ease-of-use. They are also suitable for the quick and easy mounting of additional components such as auxiliary switches, fault signal contacts, shunt trips and undervoltage releases.

Easy and safe installation

The new 5SV residual current circuit breaker can be released quickly and simply, from the bus-mounted assembly with the help of the latching slide – no other tool is needed.

Enhanced features

The new 5SV residual current operated circuit breakers with ISI and CE marking has Conditional Short Circuit withstand capability of 10kA, has Unique square terminal design, printed ON/OFF lever indication and is made up of FR Grade housing material

Highlights

- ISI and CE marking
- Unique square terminal design
- RoHS compliant
- Service life >10000 cycles or >20000 operations.
- Uniform and comprehensive accessories for further functions
- SLR feature for easy removal of a single device from the busbar mounted assembly
- More convenience and safety through an improved design

5SV3 RCCBs for Type A

Applicable in networks with AC and/or pulsated DC residual current

Current Rating: 25, 40, 63 and 80A

Sensitivity: 30, 100, 300mA

Poles: 2P (2MW) and 4P (4MW)

Also available in Type A

Super resistant **K**

Super resistant (short-time delayed) RCCBs meet the maximum permissible break times for instantaneous devices. However, by implementing a short-time delay they prevent unnecessary tripping operations, and thus plant faults, when pulse-shaped leakage currents occur – as is the case when capacitors are switched on.

Selective **S**

Can be used as upstream group switch for selective tripping contrary to downstream, instantaneous or short-time delayed RCCBs.

Betagard Residual Current Circuit Breakers 5SM3

RCCB suitability for various distribution networks.

Betagard RCCBs can be used in all 3 distribution network types viz. TN, TT & an IT network system. 4 pole RCCBs can also be used in 3 pole supply networks by adhering to installation guidelines. In this case, connection must be at terminals 1, 3 and 5 and 2, 4 and 6.

The function of the test equipment is only ensured if a jumper is fitted between terminals 3 and N.

Betagard Residual Current Circuit Breakers 5SM3

Types of Residual Current Circuit Breakers (RCCBs)

Type AC: 

Residual current protective devices of type AC are suitable only for detecting sinusoidal AC residual current (eg. Home appliances like Geyser, Ceiling fan, Iron-box, Oven etc.).

Type A: 

In addition to sinusoidal AC residual currents, residual current protective devices of type A also measure pulsating DC residual currents.

This device type is the most commonly used pulse current-sensitive residual current operated circuit-breaker. It also covers the residual current waveforms which can occur in power supply units in the case of single-phase loads with electronic components (eg. Inverter, UPS, Computer, Medical equipments, Washing machines etc.).

Type B: 

In addition to detecting residual current waveforms of type A, residual current protective devices of type B are used to measure smooth DC residual currents (eg. Battery charger, capacitor banks, server rooms etc.).

Possible residual current wave shapes and suitable residual current protective devices

Note: * MRP - Maximum Retail Price # 1MW (Module Width) = 18mm

7KT PAC1200

Multichannel current measuring system
For flexible multichannel monitoring in final distribution

- Modular & Simple installation
- Easy scalability- sensor bars available in 3,6,9 and 12 versions
- Up to 96 sensors in a single system
- Integrated web server

On- the-go access to energy data
with the help of mobile app

Available for iOS/ Android

*For more details and prices, contact Siemens Sales Office.

Ordering Information*

Type	Description
7KT1260	Data manager
7KT1233	3-Sensor bar
7KT1236	6-Sensor bar
7KT1238	9-Sensor bar
7KT1242	12-Sensor bar
7KT1254	Sensor 40 A
7KT1255	Sensor 63 A

SIEMENS

Ingenuity for life

Arc Fault Detection Device

First in Safety

As the first AFD unit, the protection device protects human lives and buildings reliably against fires caused by electricity.

The 5SM6 AFD unit from Siemens is the first one of its kind that detects serial arcing faults at an early stage. It is established since 2012 and fulfills all relevant rules and standards. With the publishing of the IEC 60364-4-42, the installation is strongly recommended all over Europe.

The 5SM6 AFD unit closes the existing safety gap and is part of a complete protection concept by Siemens – one stop safety

www.siemens.com/afd-units

AFD units with a mounted 1+N, 1MW MCB and 5SU1 RCBO

The smart solution.

Whether in an existing plant or a new installation – the 5SM6 AFD unit can be deployed in any distribution board. It quickly identifies dangerous faults caused by parallel or serial arcing faults and switches off before a fire occurs. The AFD unit detects operational arcing faults and only trips in the event of an actual fault.

Moreover the 5SM6 AFD unit offers:

- comprehensive fire protection for humans, plants and assets
- reliable covering of the existing protection gap
- enhanced protection from electrical fires in combination with MCBs or RCBOs

Reference no.	Description
5SM6011XX02	AFDD 16A, 230V, 2MW (Integrated with 1MW, 1+N, 6kA, 16A MCB)
5SM6021-2	AFDD 1-16A, 230V, 1MW (Suitable for SPN RCBO, RCBO to be ordered separately)

SIEMENS

Ingenuity for life

Perfect blend of beauty and features with assured performance

Betagard Distribution Boards

- Complete range for Residential, Commercial and Industrial Infrastructures
- DBs offer latest design with highest aesthetic appeal
- DBs available with type testing as per the latest applicable standards
- User friendly design offers ease during maintenance and assists the installer for correct installation

www.siemens.co.in

Betagard Distribution Boards

8GB32 SPN and TPN DBs

- Type Tested as per IEC 61439 Standards at neutral and internal test laboratories.
- Available in IP 20 and IP 43 Versions.
- Single Door, Metal Double Door and Acrylic Double Door options available.
- Standard Wire Way Boxes available for all single Door and Double Door DBs.
- Additional safety to users and Installers by Insulated Shorting Links, Shrouded Neutral Links and Door Earthing.
- TPN DBs can be easily made suitable for PPI configuration using TPN to PPI Conversion Kits.
- Detachable Din rail assembly and intermittent door facilitates ease in Wiring during installation and maintenance.
- DBs are manufactured by latest technology with 18 SWG and 16 SWG CRCA Steel.
- DBs are subjected to seven tanks Process and treated with Premier quality powder coating.
- Cement Masking Sheet protects the DBs against extreme site conditions.
- DBs are supplied in Dual Packing for safety during transit and storage.

Type 1 Lightning Arrestors

Type 1 Lightning Arrestors include the system cables in the equipotential bonding, which protect the low-voltage systems against the over voltages and high surge currents that can be triggered by direct or indirect lightning strikes.

The protection level of is lowered to 1.5kV by the lightning arrester, which reduces the load on the plant if a lightning strike is discharged.

The lightning arrester are enclosed and are suitable for installation in the precounter area.

All spark gaps are tripped, so that decoupling reactors are no longer required for the installation of overvoltage protection devices.

The lightning arresters are tested by wave-shaped lighting impulse, 25...100kA with Wave form 10/350µs.

Type 2 Surge Arrester

Surge Arresters type 2 are used downstream of Lightning Arresters Type 1 in main distribution boards or sub-distribution boards. They protect Low Voltage systems against transient over voltages.

The type 2 surge arresters lowers the level of protection to 1.4 to 1.5KV.

Type 3 Surge Arrester

Type 3 Surge Arresters are installed downstream of the type 2 surge arresters in Sub-Distribution Boards close to the loads in Single or multiphase systems and further limit the over voltage in order to protect the connected loads.

*Also available DC SPDs for Solar applications - contact Siemens sales office for further details

	Control Switch with 1 Make and 1 Break Contact For AC 230V/400V For 5TT58 and 5TT50			5TT59101	2725.-	1/10

Measuring Selector switches are used as CO contacts of the phase for voltages and currents in 3-phase systems for Voltmeters and Ammeters. The design of these switches is adapted to match the modular installation devices. They support use in compliance with EN 60947-3. The device has a rated insulation voltage of 660V. This permits use in many systems.

	Item Description	Voltage V AC	Voltage V DC	Current A AC	MW [#]	Reference No	Unit LP* ₹	Std. Pkg.** (Nos.)
Measuring Selector Switches								
	Voltmeter Selector Switches	400	6	12	3	7KT9010	5085.-	1
	Ammeter Selector Switches for Transformer operation	400	6	12	3	7KT9011	5565.-	1

Note:
